Train Derailment, Spill #17-3021, Carson, Los Angeles County

On 04/24/17 at 2323 hours, the California State Warning Center (CSWC) was notified of a train derailment by Union Pacific Railroad (UPRR).

- The derailment was caused by a broken rail at a customers facility that caused one locomotive and one tank car to derail upright.
- The tank car was empty at the time of the incident.
- No hazardous materials were released during the incident.
- No waterways or storm drains impacted.
- Rerailment was coordinated by UPRR.
- Notifications were made per SOP.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- Nacimiento-Ferguson Road is now opened to the public.
- A southern detour route is open to local traffic only.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Solano County: Sacramento River at Rio Vista

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be above flood stage at 4.5 feet starting the morning of 04/24/17 through 04/28/17.
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Colusa County: Sacramento River at Colusa Weir
- Sutter County: Sacramento River at Tisdale Weir, Sacramento River at Fremont Weir
- Yolo County: Yolo Bypass at Lisbon
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevinson, San Joaquin River at Newman

WEATHER OF CONCERN

Weather of Concern

- Weak weather systems will bring light precipitation through Wednesday in the Sacramento Valley. Gusty north winds develop late in the week.
- Gusty winds will affect Southwest California for most of the coming week. Moderate to locally strong northwest to north winds are expected over the mountains of Los Angeles and Ventura Counties, including the Interstate 5 Corridor and the Antelope Valley.
- **Active Weather Warnings, Watches and Advisories by County:**
- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

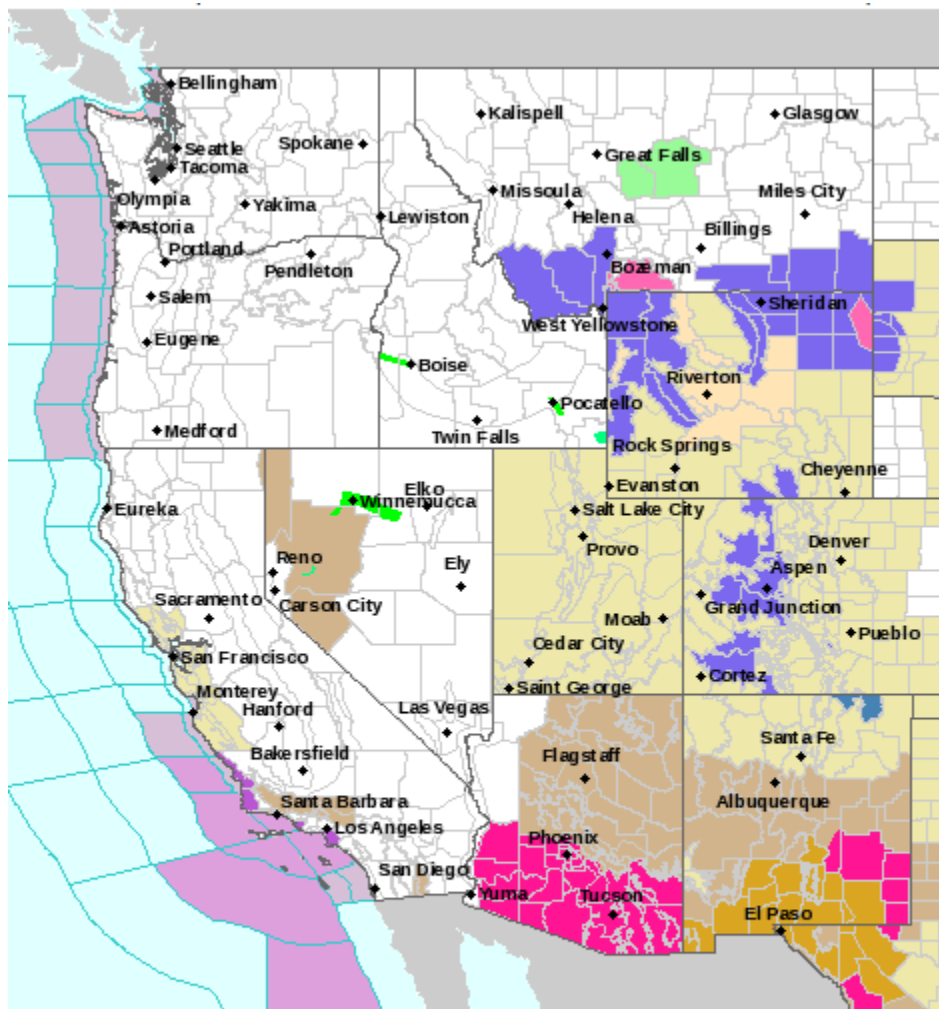

NORTHERN CALIFORNIA

Showers will linger over the region into early Thursday as a couple of small weather systems move through the Geographic Area. Overall the showers will be light, but the heaviest precipitation will be in the northern half of the region, and the northwest areas may see a period of rather steady precipitation Wednesday. Showers will be ending Thursday, and Friday through the weekend will be sunny and much warmer. Gusty south to west winds are expected today and again Wednesday, but wind speeds today will be stronger than Wednesday with gusts of 20-30 mph fairly common in the windy spots today. Beginning Thursday night, moderately strong, gusty northerly winds will develop and continue into Saturday as high pressure strengthens over the region. Temperatures will be on an increasing trend this week from 10-15 degrees below normal over the next few days to about 5 degrees above normal Sunday. The warmest inland valley areas will be in the mid 70s to low 80s Sunday.

SOUTHERN CALIFORNIA

A dry northwest flow will prevail across the region most of this week with periods of windy conditions across the mountains and deserts. The strongest winds today will be across the Mojave Desert and the eastern side of the Cleveland National Forest where sustained speeds will be in the 20-40 mph range. Lighter winds are expected tomorrow, but it will still be windy, especially across the Tehachapi Range and near the Colorado River. There will be areas of low clouds and fog along the coast, otherwise it will be mostly clear across the region this week. Daytime highs will change little through the week with highs in the 60s to mid-70s across the coastal and valley areas with 50s to upper 60s in the mountains. An offshore flow pattern will emerge Thursday night and into Friday, with gusty north to northeasterly winds developing across the coastal mountains and valleys of Southern California. The offshore flow will continue Saturday with winds diminishing by Sunday. A significant warming trend will develop over all the region this weekend as high pressure from the Pacific builds into California. Daytime highs will climb to well above normal levels by Sunday and Monday.
